### Abstract

---

**PROBLEM TO BE SOLVED:** To print out designated broadcast contents at a designated time.

**SOLUTION:** A program information storage device 110 stores data such as information fields to be printed out as a table in combination with print times. A data broadcast extract device 300 through an antenna 210 and a tuner 200 receives data multiplexed on a television signal. The device 300 extracts and analyzes data of a data broadcast program and extracts HTML data and their relating data and stores the obtained HTML data to a corresponding directory of a storage device 310 via a buffer 305. A CPU 400 reads the data from the storage device, processes the data so that the data are laid out as designated, and stores the resulting data to a layout finished data storage device 605. The data that are to be converted in a display form and stored in the device 605 are supplied to a printer 800 via a printer controller 610 at a designated time, from which the data are printed out.
